PC-12 Infineum D353X Series

Infineum is ready for PC-12, delivering equal or better performance than PC-11, backed by real-world validation and a simplified, customer-focused portfolio.

Streamlined, high-performance portfolio

- Two core PC-12 products designed for simplicity and scalability
- Cost-effective solutions delivering **API CL-4 and API FB-4 performance**
- Multi-fuel and extended drain options available (via Infineum representative)

Formulation flexibility

- ✓ Wide base stock coverage **including sustainable options**
- ✓ VM flexibility
- ✓ Viscosity coverage:
**15W-40 | 10W-40 | 10W-30 |
5W-40 | 5W-30**

New innovative chemistry delivering...

Robust wear protection

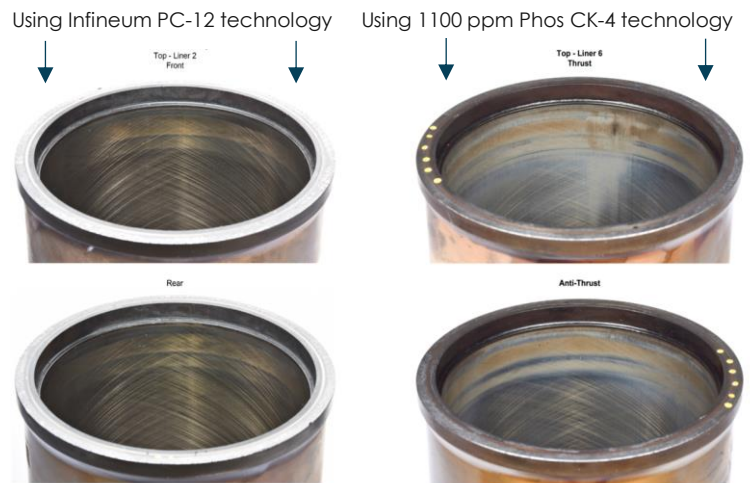

Engine durability

Excellent aftertreatment compatibility

Extended drain capability

Proven real-world performance

- Extensive field trials - on and off-road - demonstrating durability, wear protection, and aftertreatment compatibility
- Excellent real-world performance at 800 ppm Phos, both on and off-road, benchmarked to CK-4 technology and competition.

✓ Improved wear performance

Infineum is a leading additive partner in heavy-duty diesel, combining deep technical expertise with real-world validation to support customers through the PC-12 transition.
