

Performance you can rely on.

Infineum Marine Fuel Additives

CIMAC
CONGRESS **23**

Discover the latest chemical technology designed to **generate Fuel Economy, improve operability and reduce overall Carbon footprint.**

Features & Sustainability benefits

Product	Features	Sustainability benefit
Infineum B201 Sludge & Asphaltene Management	High performance fuel stabiliser & sludge dispersant for HFO and VLSFO	<ul style="list-style-type: none">▶ Increases fuel system efficiency▶ Reduce fuel losses to sludge contributing to a general reduction of CO₂ emissions
Infineum B402 Combustion Improver	The last generation of Fuel combustion improver designed to improve the CII rating without CAPEX	<ul style="list-style-type: none">▶ Increases combustion efficiency resulting in the reduction of Scope 1 emission of the vessel▶ Overall reduction of CO₂ and noxious emission

Infineum B100 & Infineum B300 Wax Management & Lubricity Improvers

A range of additives, designed to improve the fuel performance at low temperatures and minimise wear of engine hardware, increasing both sustainability and reliability.
